HUGO BOSS

HUGO BOSS has been impacted by some profound changes in the industry

- Premium and luxury apparel markets have weakened in all regions
- Global price transparency
 has rendered large price imbalances unsustainable
- Changing customer behavior requires adjustments to the route to market
- Growing importance of e-commerce provides challenges and opportunities

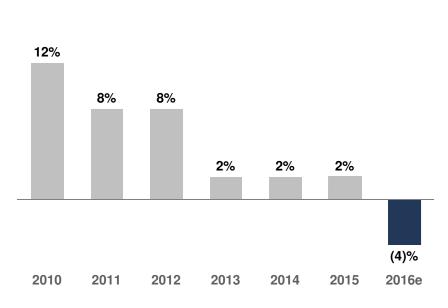

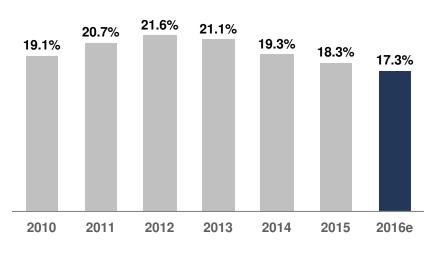

These changes have affected financial performance across the market...

...and the Group's financial performance has also deteriorated

Sales (in EUR million), adj. EBITDA margin (in %)

In addition to these industry pressures HUGO BOSS faces four key challenges

Current brand positioning is unclear

Go-to-market approaches differ by market

Current business model neglects the potential of digital

Organizational inertia affects the speed of decision-making and key operational processes

HUGO BOSS has taken immediate actions

- **Cost savings**
- Reduced operating expense growth and investments significantly
- 2 Consolidation of store network
 Initiated program to close unprofitable stores
- Restructuring of US wholesale business
 Discontinued distribution formats not in line with brand positioning
- 4 Global price harmonization
 Aligned global price levels more closely
- Digitization of business model
 Insourced online fulfillment, redesigned online store and launched mobile app

Sales

Pricing discipline and cost savings limit sales-driven earnings decline

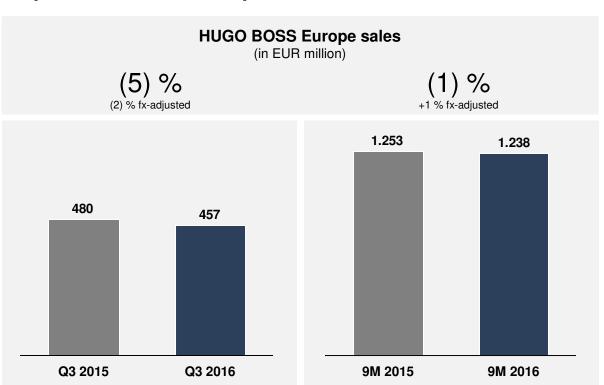

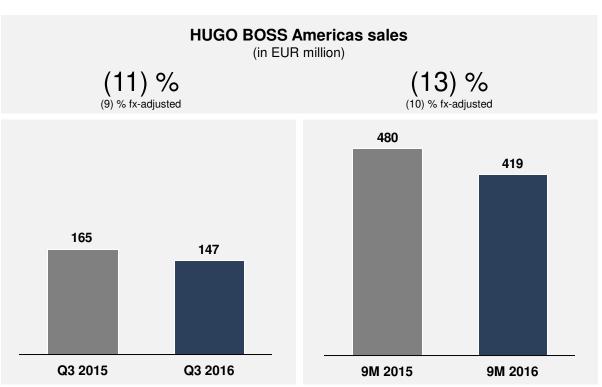

Negative market trends impact performance in Europe

- Overall apparel market very weak in August and September
- Business with tourists declines in all major markets except for the UK
- Negative timing effect in wholesale affects sales in the third quarter

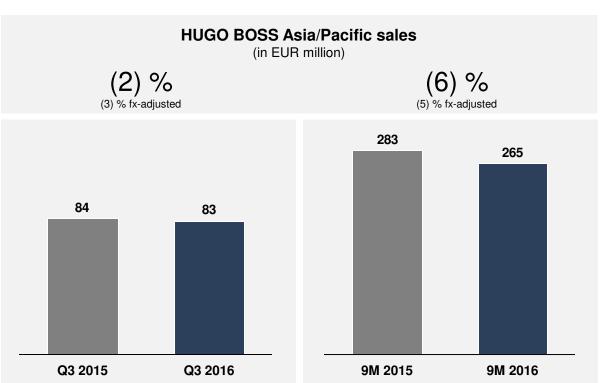

Decline of US business impacts regional performance in the Americas

- 9M sales in the US down 17% currency-adjusted, wholesale down 24%
- Measures taken to structurally improve the quality of the wholesale business account for around half of the sales decline in the channel
- US own retail sales under pressure from traffic shortfalls

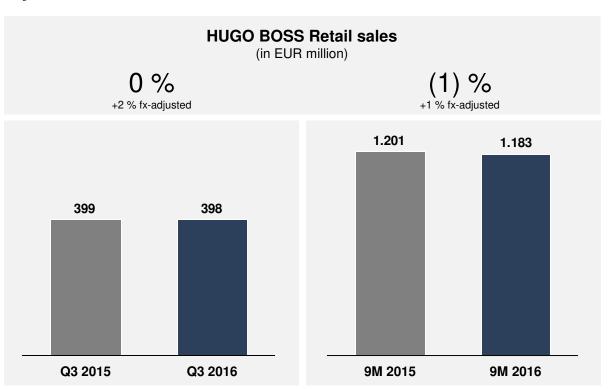

Mainland China returns to underlying growth in the third quarter

- Sales in Greater China decline 4% in Q3, down 11% year-to-date
- Store closures and decreases in Hong Kong and Macau continue to impact overall market sales
- Comp store sales performance in Mainland China improves strongly in August and September, positive in the quarter

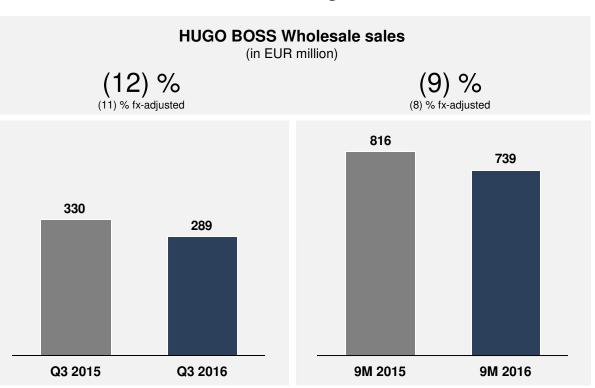

Own retail business up slightly in the first nine months

- Sales contribution from new space more than offsets comp store sales decline of 6% in Q3 (negative 7% in 9M)
- Comp store sales performance in Europe and Asia/Pacific better than the Group average
- Website relaunch and new mobile app to support online sales performance going forward

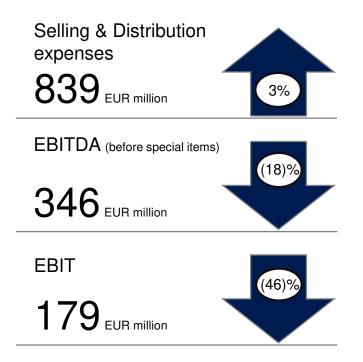

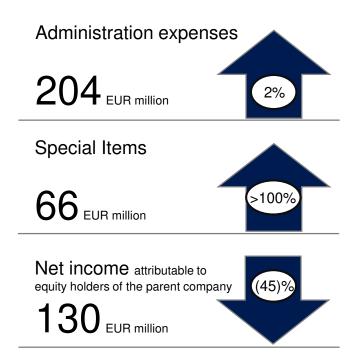

Wholesale sales affected by declines in the US and subdued global market trends

- Distribution changes in the US key driver of declines
- Demand from retail partners weak globally
- Negative timing effect impacts third quarter revenues

Higher than initially planned savings limit operating expense increase

Profitability holds up relatively well in Europe

Forward looking statements contain risks

This document contains forward-looking statements that reflect management's current views with respect to future events. The words "anticipate ", "assume ", "believe", "estimate", "expect", "intend", "may", "plan", "project", "should", and similar expressions identify forward-looking statements. Such statements are subject to risks and uncertainties. If any of these or other risks and uncertainties occur, or if the assumptions underlying any of these statements prove incorrect, then actual results may be materially different from those expressed or implied by such statements. We do not intend or assume any obligation to update any forward-looking statement, which speaks only as of the date on which it is made.
