- Decline in wholesale business mainly attributable to distribution changes in the US
- Robust growth in license business

Group profitability suffers from operating deleverage

Tight grip on working capital management despite sales decline

- Working capital almost stable in relation to sales
- Inventory position in the US and China improves significantly over the course of the year
- Group's inventory position clean heading into 2017

Lower investments more than offset earnings shortfall

- Net debt increases on low levels
- Equity ratio amounts to almost 50%

One-time nature of financial year 2016 warrants exception from dividend policy

Dividend policy of paying out between 60% and 80% of consolidated net income reconfirmed
